

Office Supplies Management

Elijah Banks, Geoffery Greiner,
Adam Deisz, Mark McDonough

Fixed Performance Issue

Supply ID	Supply Name	Quantity	Order	
1	Pencils	500	<input type="text" value="1"/>	<button>Order More</button>
2	Pens	200	<input type="text" value="1"/>	<button>Order More</button>
3	Paper	1000	<input type="text" value="1"/>	<button>Order More</button>
4	Paperclips	400	<input type="text" value="1"/>	<button>Order More</button>
5	Folders	600	<input type="text" value="1"/>	<button>Order More</button>
6	Erasers	750	<input type="text" value="1"/>	<button>Order More</button>

```
def create
  @order = current_order
  @order_item = @order.order_items.new(order_item_params)
  @order.save
  session[:order_id] = @order.id
end
```

```
def create
  @order = current_order
  @order_item = @order.order_items.new(order_item_params)
  @order.save
  session[:order_id] = @order.id
  redirect_to "/inventory"
end
```

Fixed Update Button

Inventory cart

View Inventory

<div>120 x 80</div>	<div><div>Pencils</div><div>Product description</div><div>Dunder Mifflin</div></div>	<div>\$2.50 x</div>	<div>5</div>	<div><div></div><div></div></div>
<div>120 x 80</div>	<div><div>Folders</div><div>Product description</div><div>Dunder Mifflin</div></div>	<div>\$4.00 x</div>	<div>5</div>	<div><div></div><div></div></div>

Place Order

Total price: \$32.50

```
def update
  @order = current_order
  @order_item = @order.order_items.find(params[:id])
  @order_item.update_attributes(order_item_params)
  @order_items = @order.order_items
  respond_to do |format|
    format.js {render inline: "location.reload();"}
  end
end
```

Events

Created event to subtract from inventory:

```
ALTER EVENT inv_decr
ON SCHEDULE
  EVERY 12 HOUR
  STARTS CURRENT_TIMESTAMP ON COMPLETION PRESERVE
DO
  UPDATE supplies
  SET inventory = inventory - 30
  WHERE suppliesid >= 0
  and inventory > 30;
```

Relations

Some of the admin page was not functional as the relations were not properly set up:

```
class Supply < ApplicationRecord
  has_many :order_items
end
```

```
class Order < ApplicationRecord
  has_many :order_items
  before_save :set_subtotal
```

Order Functionality

Inventory cart

View Inventory

120 x 80

Pencils

\$2.50 x

1

Product description

Dunder Mifflin

Place Order

Total price: \$2.50

```
<%= button_to "Place Order", { :method => "placeorder" }, class: "btn btn-success pull-right" %>
```

```
def placeorder
  @order_items = current_order.order_items
  @order_items.each do |item|
    @order = Order.new(:supply_id => item.supply_id, :employee_id => current_user.id,
    item.destroy
    @order.save
  end
  redirect_to "/cart"
end
```

Miscellaneous

- Changed some column names to make the tables more consistent, fixed them in the views/controllers/models
- Documentation

What's Next

1. Update quantities after an order is completed
2. Add ability to select suppliers
3. Have selected supplier affect the cost of the supply in the cart
4. Add additional admin/other functions

End
